<b>PROGRAM COST SUMMARY</b>														
ARMY		11,644			- 200		11,444		+5,084	44	16,528		+ 2,120	
NAVY		35,193			- 214		34,889		+4,218	12	50,394 e/		+ 223	
AIR FORCE		41,735			-3,823		37,912		+9,969	26	47,881		+ 345	
GRAND TOTAL		88,572			\$ -4,237		\$ 84,245		\$19,271	23	\$114,803 e/		\$ 2,688	

\* Column 4a divided by Column 3b. \*\* CVAN 68. \*\*\* CVAN 69.

a/ Unit Cost is "cost per site," includes Perimeter Acquisition Radar, Missile Site Radar, missiles, etc.

b/ Includes 31 33BN's and accompanying missiles, tenders, and range ships.

c/ Cost change due to reduction in number of missiles and range ships within 31 SSBN force.

d/ Planning Estimate; Engineering Development not yet approved.

e/ The Current Estimate of \$11,207M reflected for the ULMS program is based on the January 1972 update of the approved FYDP.

The \$11,207M is included in the Current Estimate totals for the Navy and Grand Total only. No other columns of this table contain ULMS data.

SAR PROGRAMS WITH THE LARGEST INCREASES IN  
TOTAL PROGRAM COST AND COST GROWTH

December 31, 1970 - December 31, 1971

(\$ in Millions)

<u>Program</u>	<u>Increases</u>		<u>Reason</u>
	<u>Total Program Cost</u>	<u>Cost Growth*</u>	
SAFEGUARD	1,852	999	Add-on of 4th site (Warren) and advanced preparation for 5th (NCA).
SAM-D	290	290	Add-on of inflation for FY67-69 not previously included and new inflation indices.
A-7E	265	139	54 plane increase in quantity and program stretchout (FY74-75 buys to FY67-77).
S-3A	226	226	FY73-75 buys changed from target to ceiling due to abnormal inflation.
CONDOR	87	22	Add-on of 360 missiles in program quantity and program stretchout.
SSN-688	1,327	- 361	Add-on of 6 ships (5 in FY77 and 1 more in FY73) & increased escalation. Change in cost baseline reduces cost growth.
CVAN 68/69	82	82	Increase in cost of nuclear power plant and in basic shipbuilding costs.
F-15	530	530	Renegotiation of engine contract following deletion of engines for Navy F-14B.
F-111	479	477	12 plane add-on in FY73. Higher prices at Autonetics and Pratt & Whitney. Norden settlement, IDS schedule delay; and other increases in air vehicle and support costs.
MINUTEMAN II	112	142	Add-on of FY77 support requirements and improvements in missile suspension isolation and Dust & Debris systems, closure actuator capability and G&C cooler survivability.

OASD (Comptroller)  
Dir, Info Opns  
March 31, 1972

<u>Program</u>	<u>Increases</u>		<u>Reason</u>
	<u>Total Program Cost</u>	<u>Cost Growth*</u>	
CHEYENNE	128	113	Conversion of contract to cost reimbursable type and engineering changes.

\* "Cost Growth" represents the cumulative amount of cost change (other than that due to a change in program quantity) between the program cost baseline (established at the time the program is approved for development) and the Current Estimate. Under normal circumstances, an increase or decrease in the Current Estimate results in a corresponding increase or decrease in Cost Growth except in those instances when there is a change in program quantity or a change in the program cost baseline. Thus, the difference between the program cost increases and cost growth increases reflected in the above table are due to these exceptions.

SAR PROGRAMS WITH THE LARGEST DECREASES IN  
TOTAL PROGRAM COST AND COST GROWTH

December 31, 1970 - December 31, 1971

(\$ in Millions)

<u>Program</u>	<u>Decreases</u>		<u>Reason</u>
	<u>Total Program Cost</u>	<u>Cost Growth*</u>	
F-14	3,028	- 142	Program cutback from 722 to 313 planes with deletion of F-14B model. Cost growth increase due to increased cost of Adv Tech Engine development and delays in the F-14 test program.
POSEIDON	327	327	Lower negotiated missile and other equipment costs; reduced estimates for ship conversions to POSEIDON capability.
MK-48	637	1,725	Decision to buy MOD 1 version over more expensive MOD 0/2 reduced program costs. Changeover to new MOD 1 cost baseline reduced cost growth.
DLGN-38	4,985	1,825	Program cutback from 23 to 3 ships reduced program costs. Change in cost baseline with award of 3 ship contract reduced cost growth.

\* "Cost Growth" represents the cumulative amount of cost change (other than that due to a change in program quantity) between the program cost baseline (established at the time the program is approved for development) and the Current Estimate. Under normal circumstances, an increase or decrease in the Current Estimate results in a corresponding increase or decrease in Cost Growth except in those instances when there is a change in program quantity or a change in the program cost baseline. Thus, the difference between the program cost increases and cost growth increases reflected in the above table are due to these exceptions.
